

Pistol Dynamics 'SCOUT'

The *Scout* is a purpose built 'practical' handgun that is optimized for holster use and loaded with all the features necessary to operate a handgun in the various conditions and scenarios presented to us in the real world. Whether 'practicality' to you means personal carry, SRT operations or IDPA competition, the Pistol Dynamics *Scout* is the tool for the trade.

Careful consideration was given to every option offered on the pistol. The standard 20 LPI lining pattern on the front strap and main spring housing is snagless by design. The mag catch tunnel is beveled to maximize the stroke on a standard length catch so that the risk of dislodging a magazine in the holster is minimized. Even fine details such as the charging serrations on the slide were designed to reduce the friction of slide rub when using gloves.

We have deliberately mapped out what a practical handgun should be, and with that in mind the *Scout* is offered on full-sized frames with slide lengths between 4.5" and 5" and a 4" Officers equivalent frame for off duty and concealed use. Available calibers include 45 ACP, 40 S&W and 9mm. The sights are Pistol Dynamics fixed rear and interchangeable front; with optional high visibility inserts.

Barrel fit, ignition system and function tuning is unsurpassed. Although the *Scout* is designed as a working tool the accuracy and performance is 'target' quality making the Scout a viable option as a competition handgun.

In this world of a seemingly endless array of 1911 "tactical" handguns, the Pistol Dynamics *Scout* stands head and shoulders above the rest as a truly "practical" and secure solution to everyday needs.

FAST FACTS :

- **Base Guns** - PD Chassis with External or Internal Extractor
- **Material** - Carbon Steel
- **Slide Lengths** - 4.0" - 5.0"
- **Barrel** - PD Match, Bar-Sto or Kart NM
- **Calibers** - 45ACP; 40S&W;9mm
- **Sights** - PD *ISS Fixed*
- **Ignition System** - PD Hammer, Sear and Disconnecter
- **Safety** - Custom Extended Single Side
- **Checkering** - 20 LPI Lining on Front Strap and MSH. Hand Checkering Optional
- **Finish** - Bead Blast & Blue
- **Signed Test Target** - Sub 1" @25yds Over Bag - More on Accuracy
- **Price** - Individually Quoted - Starting at **\$2900** - Includes Base Pistol
- **Current Delivery** - 11-13 Months
