

X-O
SPRINGFIELD

Shown with Optional Mag Well

The Pistol Dynamics 'Springfield' X-O draws technology from one of our premium scratch built custom handguns and blends affordability with features. The result is a sensible pistol that doesn't require any tools to field strip and maintain. It's sized to be carry friendly but still long enough to ensure a usable sight radius. It also includes one of our most successful design enhancements in the [ARP System](#) to ensure the bank vault feel missing in many Bull Barrel handguns.
